

Rare and Unusual Bird Records of Westchester County

by Michael Bochnik

This is an updated list by Michael Bochnik. It is a continuation of records compiled by Berna Lincoln, Tom Burke, John Askildsen, and others.

The purpose of this list is two-fold. One: have a record of all the vagrants, accidentals, and unusual sightings for Westchester County. Two: have a running tab of rare sightings to have an idea of changes and trends. For example, is a rare bird becoming rarer, less rare? Should a bird once considered rare, now be listed as occasional? This will also serve to estimate the rate of occurrences, for example, seen every other year, 10 years, every 50 years? The running list of rare sightings can also tell us when they are most likely to occur, spring vs. fall, September vs. October, etc.

The list follows the AOU Checklist order, last updated 2004 (45th Supplement)

Common year-round birds not listed Last update: 4 March 2009F

Barr-headed Goose

Common Shelduck
MFN: 1 EGR 18 Apr 1987

Chuckar
KB 1 Valhalla 15-22 Ap1992

Harris's Hawk
NYBW: & KB22(2): 1 Rye area Dec 1971, not banded, plumage showed
no sign of captivity.

Rose-ringed Parakeet
KB28(1): 3 MC 17 Sep 1977

Interesting and Intriguing Reports

Red-bellied Woodpecker
KB10(2) Red-bellied Woodpecker Briarcliff 17 May, 1960, first county
record.
KB12(1): Red-bellied Woodpecker, 2nd record?

House Finch
KB12(2): the first deliberate introduction of the House Finch in the
East was in Brooklyn in 1940. ... The first unquestionable record
of a House Finch on the eastern mainland was at Tarrytown, in
Westchester County, in May of 1948, followed by records at
Bedford and Armonk in 1951. The first record for Connecticut,
at Riverside, only a few miles from the Westchester line, also
occurred in late 1951.

KB02(1) Yorktown Heights 10,11 Nov 1951. 1st record in the "Kingbird"

Northern Mockingbird
First over wintering Northern Mockingbird Dec 1956 – Mar 1957
